### AMENDMENTS TO THE CLAIMS

1. (Currently amended) ~~Tamper~~A tamper-evident labelling material ~~including comprising~~ a base layer of synthetic paper that is printable on its upper surface, and an adhesive layer on the lower surface of the base layer, ~~characterised~~ characterized in that the base layer ~~includes comprises~~ a layer of biaxially-oriented and voided high density polyethylene (HDPE) that has a density of not more than  $0.6\text{g cm}^{-3}$ .
2. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in claim 1, wherein the layer of biaxially-oriented and voided HDPE has a density of not more than  $0.5\text{g cm}^{-3}$ .
3. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in claim 1 ~~or claim 2~~, wherein the mean cohesive strength of the labelling material is not more than about 4N.
4. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in claim 1 ~~or claim 2~~, wherein the mean cohesive strength of the labelling material is not more than about 3N.
5. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in ~~any preceding claim~~ claim 1, wherein the base layer ~~includes comprises~~ a coextruded core layer of biaxially-oriented and voided HDPE between upper and lower skin layers, wherein the skin layers have a density of more than  $0.6\text{g cm}^{-3}$ .
6. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in claim 5, wherein the skin layers have a density of more than  $0.9\text{g cm}^{-3}$ .
7. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in claim 5 [[or 6]] wherein the skin layers have a thickness of not more than  $2\mu\text{m}$ .
8. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in claim 5, ~~6 or 7~~ wherein the skin layers consist of biaxially-oriented and substantially unvoided HDPE.
9. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in ~~any of claims 5 to 8~~ claim 5, wherein the thickness of the core layer is about  $100\mu\text{m}$ .

Appl. No. : unknown  
Filed : herewith

10. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in ~~any preceding claim~~claim 1, wherein the base layer ~~includes~~comprises a printable layer comprising a polymeric binder, an absorbent pigment and an antistatic agent.
11. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in claim 10, wherein the binder: pigment dry weight ratio is in the range 15:100 to 50:100, ~~preferably 22:100 to 35:100~~, and the antistatic agent: pigment dry weight ratio is from 0.4:100 to 2.5:100.
12. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in claim 11, wherein the binder comprises a carboxylated styrene-butadiene copolymer.
13. (Currently amended) ~~Tamper~~The tamper-evident labelling material as claimed in ~~any preceding claim~~claim 1, substantially as herein described with reference to Example 1 or 2.
14. (Currently amended) ~~The use in~~A method of using a labelling material, wherein the labelling material, ~~which includes~~comprises a base layer of synthetic paper that is printable on its upper surface and an adhesive layer on its lower surface, for the purpose of imparting tamper-evident properties, of a layer of biaxially-oriented and voided high density polyethylene (HDPE), characterized in that the layer of biaxially-oriented and voided HDPE has a density of not more than  $0.6\text{g cm}^{-3}$ .
15. (Currently amended) ~~The use-method~~ as claimed in claim 14, wherein the layer of biaxially-oriented and voided HDPE has a density of not more than  $0.5\text{g cm}^{-3}$ .
16. (Currently amended) ~~The use-method~~ as claimed in claim 14 ~~or claim 15~~, wherein the mean cohesive strength of the labelling material is not more than about 4N.
17. (Currently amended) ~~The use-method~~ as claimed in claim 14 ~~or claim 15~~, wherein the mean cohesive strength of the labelling material is not more than about 3N.
18. (Currently amended) ~~The use-method~~ as claimed in ~~any one of claims 14 to 17~~claim 14, wherein the base layer ~~includes~~comprises a coextruded core layer of biaxially-oriented and voided HDPE between upper and lower skin layers, wherein the skin layers have a density of more than  $0.6\text{g cm}^{-3}$ .

**Appl. No.** : **unknown**  
**Filed** : **herewith**

19. (Currently amended) The use-method as claimed in claim 18, wherein the skin layers have a density of more than  $0.9\text{g cm}^{-3}$ .
20. (Currently amended) The use-method as claimed in claim 18 ~~or claim 19~~, wherein the skin layers have a thickness of not more than  $2\mu\text{m}$ .
21. (Currently amended) The use-method as claimed in claim 18, ~~19 or 20~~ wherein the skin layers consist of biaxially-oriented and substantially unvoided HDPE.
22. (Currently amended) The use-method as claimed in ~~any of claims 18 to 21~~ claim 18, wherein the thickness of the core layer is about  $100\mu\text{m}$ .
23. (New) The tamper-evident labelling material as claimed in claim 10, wherein the binder: pigment dry weight ratio is in the range 22:100 to 35:100, and the antistatic agent: pigment dry weight ratio is from 0.4:100 to 2.5:100.
